Assignment Test - 5

1) React:

It is Javascript Library used to build user Interface (UI), especially Web Applications

* It helps to Reuseable U.I Components

2) Is React is library or framework:

* React is Libarary, but not framework

* Library → Focus only on UI
* Framework → Full Structure (routing, state, et

3) Key Features of React:

* Component Based Architecture
* Virtual DOM (fast updates)
* JSX support
* High performance

4) What is Single page Application

The SPA Loads one HTML page & updates the Content Dynamically without Reloading

5) What is Component in React:

The reusable or Small pieces of UI
ex: Button, Navbar, Card

6) What is functional Component:

It is simple JS function that returns JSX

```
function Hello(){
    return <h1> Hello World </h1>;
}
```

7) What is JSX: (XML)

It allows you to write HTML like code inside JS

ex:

```
Const element = <h1> Hello </h1>;
```

8) Can Browser Understand JSX directly

No, Browser Understand only JS, Not JSX

9) What is babel in react:

* It is JS Compiler
* It Converts JSX → JS Normally

10) What is Virtual Dom:

* It is lightweight Copy of Real Dom
* faster performance

11)

Functional Component	class Component
* Simple function	* ES6 Class
* Modern	* older approach
* Short & clean code	* More bug codes collapse
ex: function app() { return <h1> Hello </h1>; }	ex: Class App extends React.Component { render() { return <h1> Hello </h1> } }
